

BRONCO

Ideally suited for smaller horsepower tractors the Gessner Bronco is a reliable and well designed deep ripper that will suit those farmers with smaller acres requiring a primary till. Standard tyne spacing is 500mm for both the 5 and 7 shank models. However, custom machine sizes and various tyne configurations are available to suit all customers requests. Hook the Gessner Bronco on and off your tractor in minutes.

PRODUCT FEATURES:

- 100mm x 100mm x 9.0mm heavy RHS steel frame
- Welded CAT 2-3 and CAT 3 three point linkage or trailing rigid hitch
- Gessner designed and proven tyne assemblies with replaceable wear points and shin guards
- F77, A77 and HR tyne assemblies available

OPTIONAL:

- Shank mounted swivel coulters
- Depth wheels attached to assist the consistency of tyne depth
- Angle iron crumble roller assemblies to suit both 5 and 7 tyne models
