
BLADE REFURBISHMENT & CONVERSION

EXTEND THE LIFE OF YOUR DOZER BLADE

Gessner provides structural blade conversions, refurbishment and rebuild solutions designed to restore performance and extend the working life of your equipment.

DOZER BLADE CONVERSION

A PRACTICAL ALTERNATIVE TO REPLACEMENT

Gessner provides full structural conversions across a range of dozer blade models and sizes, including:

- SU Blade → U Blade
- U Blade → SU Blade
- Available for blade sizes from D9 to D11
- Engineered to deliver a high-quality, fit-for-purpose conversion
- A practical alternative to costly equipment replacement

DOZER BLADE REFURBISHMENT

REBUILD. REPAIR. RETURN TO WORK.

Full blade refurbishment and rebuild services include:

- Replacement of front skins
- Refurbishment or replacement of mouldboard sections
- Refurbishment or replacement of end plates
- Repair of rock guards
- Refurbishment of mounting points
- Replacement of wear plates
