

DOZER PROTECTION

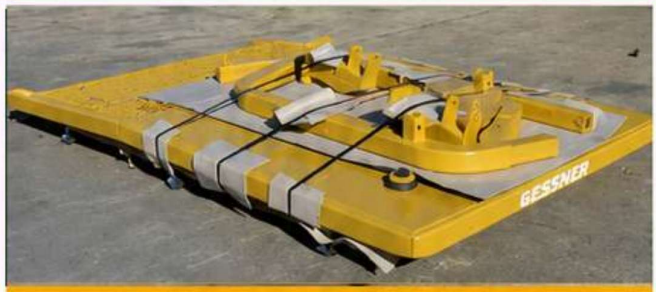

BUILT TO PROTECT. DESIGNED TO FIT.

Gessner offers a range of dozer protection solutions designed to suit different makes and models.
Our base model canopy systems provide practical machine and operator protection, with configurations tailored to your application.

BASE MODEL CANOPY

PROTECTION TO SUIT YOUR MACHINE

Gessner base model canopies start with a solid roof and front sweeps to protect the lift cylinders. Additional components include the option of mid and rear structural supports.

BASE MODEL FLAT PACK CANOPY

- Modular design to suit individual dozer models
- Roof and front-cylinder protection as standard
- Optional middle and rear legs for additional structural support
- Available factory-fitted or supplied as a flat pack
- Detailed fitting instructions supplied for installation

FULL SCRUB CANOPY (CAT D6)

FULL SCRUB CANOPY

HEAVY-DUTY PROTECTION FOR DEMANDING CONDITIONS

When the job demands a higher level of operator protection, Gessner Full Scrub Canopies provide a strong, purpose-built solution for tough working environments.

BUILT FOR SERIOUS PROTECTION

- Heavy-duty 9.5mm RHS construction for strength and durability
- Minimum 8mm plate for increased overhead protection
- High-tensile mesh panels for added operator protection
- Double-bar cylinder protection for demanding applications
- Purpose-built to suit the dozer and working requirements
