

STICK RAKES AND TREE SPEARS

BUILT TO HANDLE TOUGH CLEARING WORK

Gessner Tree Spears are built for demanding land-clearing applications, combining heavy-duty construction with practical mounting options to suit your machine.

TREE SPEARS

KEY FEATURES

- Trunnion mount configuration
- Heavy-duty boxed construction for maximum strength
- High-tensile teeth as standard
- Ball-and-cup connection allows controlled movement under load

BLADE MOUNT SPEARS

- Can remain fitted alongside a stick rake when required
- Slotted top mounts and rear reinforcement help reduce flex and cracking

TRUNNION-MOUNTED TREE SPEARS

BLADE MOUNTED TREE SPEAR

STICK RAKES

Gessner Stick Rakes are built tough for demanding earthmoving and clearing work — designed to handle heavy loads while helping protect your machine.

KEY FEATURES OF GESSNER STICK RAKES

- Heavy-duty solid plate main beam construction.
- 450-grade high-tensile, wear-resistant alloy tynes, available in solid or fabricated options.
- Unique Gessner design carries the load rather than simply pushing it, allowing effective use of available horsepower.
- Forward-angle radiator guard helps protect the front of the dozer.
- Simplified attachment system for easy connection and disconnection.
- Swing-down legs support the rake when detached from the dozer.
