

# MODULAR GRADER FRONT PUSH BLADES

## ONE PLATFORM. THREE LEVELS OF CONTROL.

Gessner Modular Grader Front Push Blades are designed for versatility, durability and efficient operation, with three configurations to suit different grading requirements.

### BUILT FOR THE JOB

Heavy-duty  
structural  
construction

Long-lasting  
hydraulic  
cylinders  
and fittings

Replaceable  
cutting  
edges

Adaptable  
mounts and  
hard-wearing  
pins and bushes

Modular design  
allows additional  
tilt and angle  
functions as  
required

## CHOOSE YOUR CONFIGURATION

### 01 HYDRAULIC LIFT

Parallelogram hydraulic lift provides vertical blade movement for straightforward grading applications.

### 02 HYDRAULIC LIFT + TILT

Adds heavy-duty hydraulic tilt, providing up to 15° left and right tilt.

### 03 HYDRAULIC LIFT + TILT + ANGLE

Maximum operational flexibility, adding hydraulic angle adjustment of up to 20° left and right.

### MODULAR BY DESIGN

- > Start with the configuration that suits your operation and add tilt or angle functionality as your requirements change.
- > Available factory-fitted or supplied with fitting kits and detailed installation instructions.
