

BEDFORMER

FRAME:

- 178mm x 178mm x 9.5mm RHS frames are available in rigid or folding configurations.
- Trailing or three point linkage hitch options are available.
- Frames are available to suit multiple bed configurations.

BEDFORMER UNITS:

- Fully adjustable Bedformer boards ensure that almost all bed depth and width requirements are catered for.
- 1.83 – 3m beds can be achieved through clamp adjustable shank assemblies.
- A77 depth adjustable shanks with machined shear pins come as standard.
- Hydraulic release shanks are available (requires hydraulic accumulator kit)

The unique design of Gessner Bedformers ensures that almost all bed depth and width requirements are catered for. Featuring a heavy-duty frame construction, customisable units and angle-iron crumble roller, the Gessner Bedformer is a field proven performer in strength, durability and operational effectiveness.
